Filter+ Anti-Scale

High Energy

Energy Saving

Smart Home product is developed with unique XAR technology that incorporates dual functionality of scale prevention and sediment filtration. The core of the cartridge houses the proprietary XAR media within thermally bonded polypropylene very fine filter. The XAR treatment is a simple, effective and economic solution for the problem of scale deposits. When water passes through the system formation of calcium carbonate scaling or precipitation is prevented by encrustation, without affecting the hardness of the water. Over the time, it also tends to break down existing deposits. XAR also provide effective protection against corrosion by creating a thin protective film on the surface of the pipes, coils and water heaters etc.

Better Smaller Easier

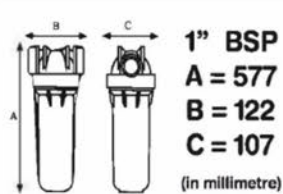

- + No Salt
- + No Electricity
- + No Regeneration
- + No Water Wastage
- + Easy Installation
- + Space Saving Design
- + Economical

Slimline 200

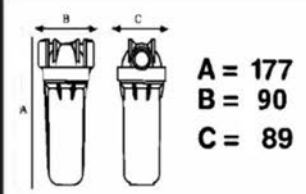

Dosafos Mignon

5 Micron Filtration
Max. Pressure. 8 bar
Max. Hardness. 500 ppm
Max. Life span 6 months

Flow 1600 LPH

Maximum flowrate

Max. Temp. 35°C
Max. Pressure. 4 bar
Max. Hardness. 500 ppm
Max. Life span 6 months

Flow 1000 LPH

Maximum flowrate

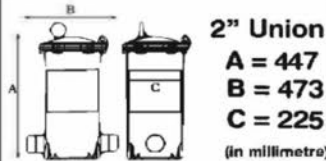

Bigline 200

Highline 100

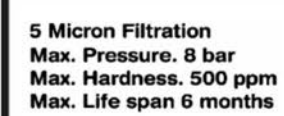

Highline 200

5 Micron Filtration
Max. Pressure. 8 bar
Max. Hardness. 500 ppm
Max. Life span 6 months

Flow 5000 LPH
Maximum flowrate

SUITABLE FOR 2000 LPD

SUITABLE FOR 5000 LPD
